Kala cares so much about her patients. She worked diligently to provide me with the best possible plan specifically for me. "I'm not sure about that" is a challenge for her. She will find out answers and keep going until we get results. I asked soooo many questions and she was very patient going over results and a plan for me. With her help and the help of other doctors, I was able to get pregnant with my perfect rainbow baby. She is caring and extremely knowledgeable. I went to see other doctors with no results, come to find out, with Kala's help, that I have PCOS and hypothyroidism... If you want answers/results, go see Kala.

I am a 63 year old male and noticed that I had less energy and lost much of my motivation to work hard and work out. I had a family member who sees Kala and she told me I needed to call her and set up a consultation with her. I did and after extensive lab work I found out I had very low thyroid levels and low testosterone levels as well. She put me on supplements as well as Thyroid and Testosterone replacement therapy and my life has change dramatically. I feel like a did when I was 40 and my quality of life has increased dramatically. If you are an male of female and don't have the get up and go you sued to you must call Kala!

It has been such an incredible blessing and experience coming to Kala DeHaan. I have enjoyed a couple of services from Kala and this last one on Thermi Smooth has shown immediate results for my skin and over all appearance! I would truly recommend anyone to set up a consultation or get a service done by them! You won't be disappointed!!!!!! CALL TODAY!!!

Sincerely,

Vicki

I feel so blessed to have found Kala DeHaan!!! I am a 56 year old, just now going through menopause. My hormones were all over the map. She has helped me feel so much better. She takes the time to go over all your needs, a service you don't get any more. So personal and caring. CHECK her out!!!! I feel better than i have in a long time.

THANK YOU!! Shelia

This lady changed my life. I walked into her office with a medical history that looked like a tangled ball of yarn. She did not give up on me. When I started to lose hope, she kept encouraging me. She painstakingly took the time to find the answers, send me to specialists, and never stopped praying. I would get random texts from her telling me she was praying and that I would be okay. If you are ready to be healthy and need a champion who thinks out of the box and won't give up on you, I highly recommend @pinklinkmedical and Kala DeHann-Hill. Larry and I are so thankful for her role in my health breakthrough.

For the past couple of years, I have been seeing Kala DeHaan-Hill, NP, at her practice, Pink Link Medical. I'm about to turn 50 and I remember going to my normal Ob-Gyn for the past 10 years or so, and him saying all these random things to me about what was wrong with me, in sort of a not very important and run of the mill conversation. I didn't pick up on all the alphabet that was wrong with me, it was just mumbling all jumbled up. So for years I have known I had something called PCOS, and probably something called Adenomyosis for the past couple of years mixed with some Endometriosis, and some issues with clarity, mental fog, being exhausted all the time, not able to sleep, not able to wake up, and did I mention I was 150# overweight just 4 years ago? He didn't give me any tips, meds or labs. He just brushed it off as not so important is what I gathered from those encounters. Meanwhile, I'm morbidly obese and feeling horrible most days with migraine headaches that would make me not able to function.

From the moment I read a review online, to booking my first appointment, to the follow-up to go over my labs, this process was pretty easy and extremely fulfilling. This is one of the smartest, brightest and most gifted medical providers I have ever had the opportunity to work with. If you are trying to get healthy and be the best you possible, can't recommend her enough.

So from the beginning she worked with hormone replacement therapy with me, also working on my T3 level that was off. She fixed everything you could imagine. Her magic supplements and scripts really have done great things for me. In the first month my constant migraine headaches were a thing of the past. Overall I changed my diet more, eating a better selection of foods that she recommended. Then around September of last year she asked me again about something she had mentioned early on. By now I was already down about 30 pounds since getting my thyroid working correctly in the past year with her. She mentioned how she could help me with the weight if I was ready for something that was guarantee to work, if I followed the protocol. I didn't know what she was talking about, but she said something about I could lose 30 pounds in 6 weeks. I jumped at the chance as it was almost my birthday. For years I asked the doctor to give me a magic pill to lose weight fast. Basically it was an elimination diet where we took all bread, dairy and wheat out of my diet. I followed protocol pretty perfect, recording everything I was eating and I managed to lose 35# in 6 weeks. I have maintained my weight loss now another six months.

There is no better person to help you get everything regulated and under control with your hormone levels and thyroid functioning that this lady. I am happy to say I am now over 100 pounds down since my weight loss journey began. Kala and the lessons I have learned from her are a huge reason why. I highly recommend her for your Bioidentical hormone replacement therapy and thyroid dysfunction.
